PROJECTS

My Family Story • <http://myfamilystorycoloringbooks.com/>

MongoDB, Mongoose, Angular, Node, Express

- Lead back-end developer for full-stack coloring book creation application.
- Self-taught Mongo and developed the project database
- Wrote project endpoints and implemented Stripe payment software
- Used daily stand-ups, GitHub issues, Trello, and other means to organize workflow

Twitter Personalities • <https://twitterpersonalities.herokuapp.com/>

RESTful APIs, Angular, Node

- Translated a Python tutorial project into Node and added a graphic user interface.
- Used the Watson Personality Insights and Twitter APIs to compare two individuals' personalities in the form of their Twitter feeds.

Masters of Japanese Landscape Painting • <http://museum.juliekohler.me>

Angular, PostgreSQL, Node, Express

- Designed and engineered a full-stack museum exhibit site that included e-commerce, Auth0 login, and Stripe payment components.
- Utilized the Google Maps API for embedded navigation
- Developed a fully functional shop that allows customers to browse, buy, and review orders
